

Public Works Department

Construction & Demolition (C&D) Waste Management

Benefits of Reducing and Recycling C&D Waste

- Cleaner job sites
- More efficient operations
- Good business practice
- Comply with local ordinances
- Extended life of local landfills
- Environmental stewardship
- Positive public image

If you have questions about the C&D recycling program, please contact Julie Tran of the Public Works Department at (310) 603-0220 ext. 817 or email jtran@lynwood.ca.us.

C&D Application Process

Each year, hundreds of thousands of tons of landfill waste is construction and demolition (C&D) debris. Much of this debris can easily be recycled, and many recyclers accept C&D materials at lower prices than landfills. Some facilities can only take clean, separated materials, while others can take mixed loads and process them for recycling.

All Permitted Structures—The City of Lynwood requires that all commercial and some residential construction, demolition, or remodeling projects recycle or reuse at least **65%** of the materials that leave the project site.

After submitting your application for a building permit, you must complete a Waste Management Plan (WMP), demonstrating how you will recycle a minimum of 65% of the construction waste generated from your project and submit the WMP form to Public Works, Engineering Division. The WMP form is available at the Building Permit counter, Public Works Yard, and/or the City's website.

The WMP consists of three parts:

Part I

- Provide information regarding the project.

Part II

- Estimate the amount of tonnage to be disposed and diverted during construction. This part does not need to be completed if using the City's franchised hauler, Waste Resources Inc.

Part III

- Show what tonnage was actually diverted and disposed of
- Provide disposal/diversion receipts or certifications.

The completed WMP form, along with all receipts and/or documents verifying how the waste from your project was disposed, must be submitted to the Public Works Department. This is required before your project can be scheduled for final inspection.

Public Works Department

Construction & Demolition (C&D) Waste Management

C&D Application Process

Note: If Applicant would like to use the City's hauler for the C&D compliance, contact Waste Resources Inc. at (310)366-7600.

Make sure to specify "C&D Recycling Service".

Part II of the WMP does not need to be completed if you Applicant is using Waste Resources for their C&D hauling services.

1. Obtain a WMP form and complete Part I and Part II (if it applies).
2. Submit the WMP to Public Works for review.
3. Public Works will notify the Applicant on the completeness of the WMP (Part I and Part II), the Recycling Fee, and any other application fee that may apply.
4. Applicant will pay the Recycling Fee at City Hall at the cashier window.
5. Applicant will show Public Works (Engineering) proof of receipt.
6. Public Works will conduct inspection(s) on C&D compliance.
8. Once project is complete, Applicant will submit Part III of WMP, along with hauler certification(s), to Public Works Engineering.
9. Applicant to schedule a final inspection by Public Works Inspector for C&D compliance.
10. Final approval by Public Works is needed on the Building Inspection Card to clear C&D Compliance.
11. Refund of Recycling Fee issued to the Applicant is contingent upon actual diversion/recycling percentage as calculated by Public Works.
